Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4, 5, 10, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Portman et al. '099 in view of Yip.

There is disclosed in Portman a container for serving infused liquid beverages made from infusion bags having a string and tag attached, the container comprising a receptacle 11 for holding liquid, a lid 21 for the receptacle provided with an opening having a first portion (slits) 47 which are capable of gripping the string of the infusion bag and a second portion (aperture) 61, located on the first portion, through which the string of the infusion bag can move, and a dispensing outlet 91 in the lid, wherein the first portion comprises a plurality of slits which are aligned with the aperture and extend at angles therefrom.

Yip discloses a tea bag string gripping member 24d' (figure 4d) having a first portion comprising a first slit with further slits that extend at right angles therefrom, further wherein the first slit with further slits results in four right angles.

It would have been obvious to one skilled in the art to modify the slit formation of Portman with that disclosed in Yip, in order to provide an alternative arrangement for gripping the string.

In regards to claims 5 and 14, the passing of the tag through the slit without folding is as much a function of the tag size as it is the length of the slit. Thus, the length disclosed in the prior meets the limitations of the claims for smaller tags.

### ***Response to Arguments***

Applicant's arguments filed 27 April 2006 have been fully considered but they are not persuasive. Applicant states that the prior art would require a different pull or different tension when attempting to catch a tea bag within the lid. The Yip reference discloses a slit orientation that is equivalent to that claimed. The slits form four ninety degree angles and therefor would render a larger amount of plastic to be displaced when the string is pulled into position.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
